1  **Supplementary File S6: Installation with Rstudio.**

2  For Rstudio users, with some versions of R and/or Rstudio it may be necessary to restart the R session

3  just after installing the package (for instance by closing Rstudio and re-opening it) *before* launching the

4  *library(CNVmap)* command. Otherwise, errors may be generated when trying to auto-complete the

5  package name.
