

Figure S11: Distributions of F_{ST} under each of the 16 unique demographic treatments under three selection regimes: Pheno_{Div} (divergent selection), Pheno_{Null} (stabilising selection) and Neutral, after 100 generations. Upper 5% quantiles are highlighted for each distribution, with linetype corresponding to selection: Solid = Divergent, Dashed = Stabilising, Dotted = Neutral. Each distribution represents data pooled from 20 iterations of 100 gene windows (N = 2000).
