

Figure S2. Comparison of gene expression changes (A) The $|\log_2\text{FC}|$ values of all the genes based on *E. faecalis* exposure relative to *E. coli* exposure were plotted for the *skpo-1* mutant vs. N2 animals. **(B)** The $|\log_2\text{FC}|$ values of all the genes in the *skpo-1* mutant background relative to N2 were plotted for animals exposed to *E. faecalis* vs. *E. coli*. The original data are in Table S1.
