

A.**B.**

Figure S8 Among *let-7*-family microRNAs, *let-7* microRNA has the most favorable hybridization to the lin-41 mRNA 3' UTR SMs. Predicted hybridization MFEs of *let-7*-family microRNAs with the lin-41 mRNA 3' UTR bulge-SM+SUP (A) and GU-SM+SUP (B) in *Caenorhabditis* species. Statistical significance was determined using a two-tailed Student's t-test. **** $P \leq 0.0001$.
