### Supplementary information

**Figure S1** Numbers of informative tags per number of genotypes in 2015 (**A**) and 2016 (**B**) with a minor allele frequency of 10%. In this study, a 100 genotype threshold was used for the 2015 data, resulting in 1120 informative tags (green line in graph **A**) and a 50 genotype threshold resulting in 1079 informative tags (purple line in graph **B**) was used for the 2016 data.
