

Figure S2: (A) Boxplots of log₂ fold change in expression (Δ rsd/wild-type) for genes whose expression is significantly reduced in Δ rpoS in the indicated growth phase, compared to all other genes. (B) Boxplots of log₂ fold change in expression (Δ rsd/wild-type) for reported σ^{38} targets in the indicated growth phase, compared to all other genes. (C) Boxplots of log₂ fold change in expression (Δ rsd/wild-type) for genes whose expression is significantly increased in Δ rpoS in the indicated growth phase, compared to all other genes. p-values are for Wilcoxon Test.
