

Figure S4. Expression of Pom33-GFP₁₋₁₀ and Ub-Pom33-GFP₁₋₁₀ rescues NPC clustering in *pom33*Δ. NPC distribution was assayed in wild-type and *pom33*Δ cells containing Nup188-mCherry. To test for rescue, Pom33-GFP₁₋₁₀ or Ub-Pom33-GFP₁₋₁₀ were added back to *pom33*Δ cells. Quantification of Nup188-mCherry clustering in each strain is plotted below. Bar, 2 μm.
