Yeung and Smith, Figure S3

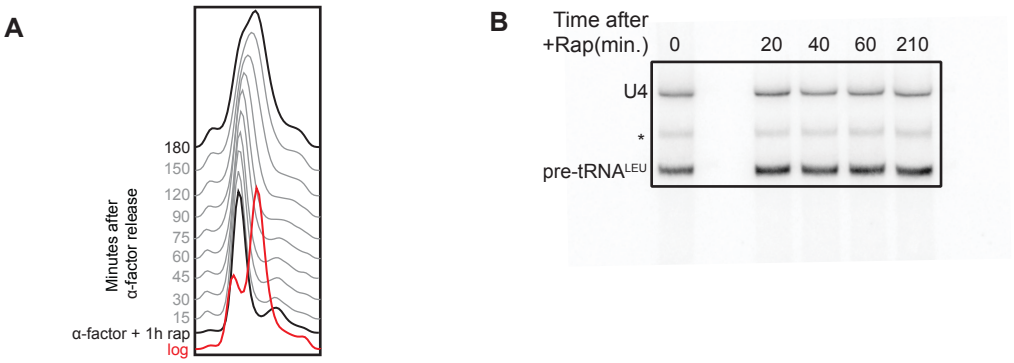

Figure S3: The effect of topoisomerase depletion on replication and transcription.
(A) Flow cytometry analysis of DNA content of *top1Δ TOP2-FRB rrm3Δ.*
(B) Northern blot using an intronic probe against $tRNA^{Leu}$ from *top1Δ TOP2-FRB rrm3Δ* upon rapamycin-induced nuclear depletion of FRB-tagged proteins. * indicates pre-tRNA intermediates,10ug total RNA/lane. Loading control: U4 snRNA.
