

	25°C				25°C to 75°C			
[CX-5461] (30 μ M)	-	-	+	+	-	-	+	+
Mung Bean Nuclease	-	+	-	+	-	+	-	+

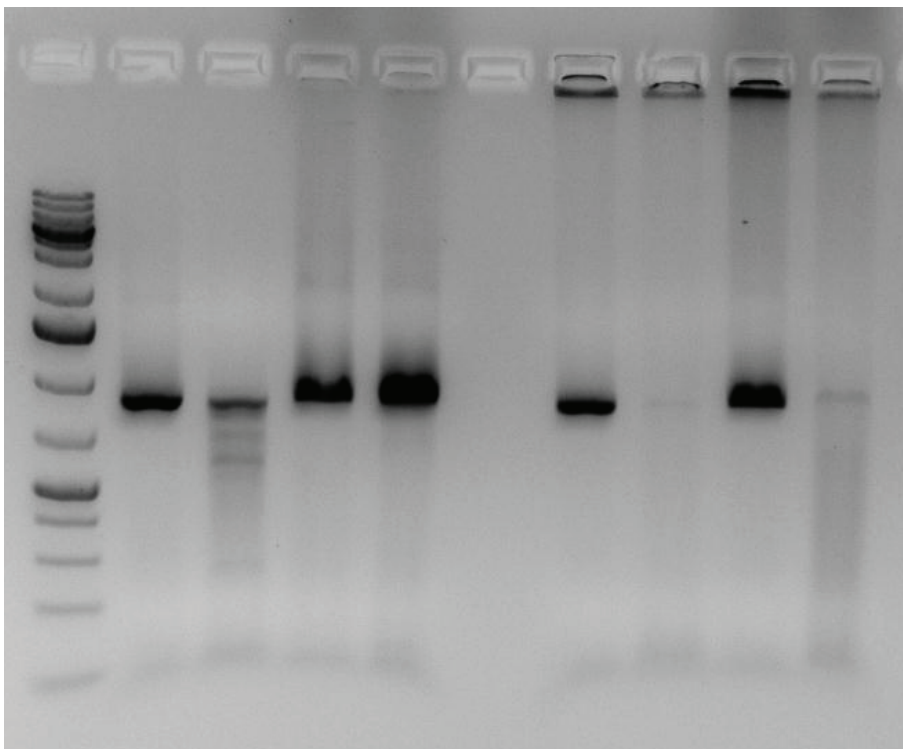

Figure S4. CX-5461 does not inhibit mung bean nuclease. CX-5461 (30 μ M) stabilizes PCR products at 25°C. MBN degraded DNA in the presence of CX-5461 when the temperature was raised from 25°C to 75°C in 10°C intervals every 5 minutes.
