

**Supplementary Figure S3. Structures of plasmids used in the plasmid loss assay.**

A. Schematics of the ARSs used. **B.** Schematics of the plasmid constructs used in C. pST1963 is a derivative of YCplac111 and lacks the ARS1 sequence. ARS1, HML! ARSs were inserted into the indicated site of pST1963 to yield pST1980-82. URA3 was inserted into pST1980-82 to yield pST1997-2000. **C.** The indicated plasmids were introduced into the wild type (Wt: W303-1a Δbar1), $\Delta sir1$ (YST1928), or $\Delta sir2$ (YST1930), and transformed cells were serially diluted, spotted, and grown on the indicated selective plates. **D.** Schematics of plasmids used in the plasmid loss assay in Figs. 3 and 4C.
